Career Objective

As the Founder and Software Engineer of iTechie 360, my goal is to drive innovation by developing our own scalable solutions while also delivering high-quality, client-ordered software products. I am committed to leveraging cutting-edge technologies to create seamless, efficient, and impactful digital solutions that enhance user experience and business operations. Currently seeking to bring technical leadership and problem-solving skills to a fast-paced, growth-oriented company. I am open to opportunities while continuing to run my startup on a flexible basis.

Profile

I am a passionate and innovative Software Engineer and Founder of iTechie 360, a company dedicated to developing scalable and impactful software solutions. With a strong foundation in diverse technologies, I specialize in designing, building, and optimizing applications for web, mobile, and desktop environments. My expertise extends beyond coding—I am deeply invested in problem-solving, strategic planning, and delivering user-centric solutions that drive business success. I thrive in dynamic environments, continuously seeking new challenges to refine my skills and expand the technological reach of iTechie 360.

Work Experience

June 2020 – Present

Founded iTechie 360, a software development company that creates scalable enterprise solutions for various industry domains that cut across the vast technology ecosystem, encompassing web, mobile and desktop environments. My expertise lies in harnessing diverse technologies to bridge the gap between these platforms, fostering seamless user experience and delivering impactful results.

January 2016 – June 2020

Freelance – Software Engineer

Tech Stack

Operating Environments: macOS, Windows, Linux

Languages: Java, Python, JavaScript, PHP, Swift
